SUMMARY

Software Engineer building scalable APIs, real-time systems, and AI-powered products across LMS, SaaS, and WhatsApp automation platforms. Contributed to production systems serving 1,000+ users and 40+ enterprise clients. Solved 800+ DSA problems with a Top 16% global LeetCode ranking.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Python, Java

Backend & Systems: Node.js, Express.js, Flask, REST APIs, WebSockets, Redis, SQL, MongoDB

Frontend: React.js, Next.js, Redux Toolkit, Zustand, Tailwind CSS

Cloud & DevOps: AWS (EC2, S3), Git, Docker, GitHub Actions, CI/CD, Linux (Fedora)

Core Concepts: OOP, Database Design, Operating System, System Design, Distributed Systems

EXPERIENCE

Software Engineer Trainee, UpGrad — Bengaluru, Karnataka Feb 2026 – Present

- Engineered RESTful APIs using Node.js, Express, and PostgreSQL for an LMS platform serving 1,000+ active users.
- Implemented RBAC-based authorization and automated cron-driven workflows for recurring backend operations
- Optimized PostgreSQL queries and connection pooling to improve API performance under concurrent workloads.

Full Stack Engineer Intern, Revspot AI — Bengaluru, India Sep 2025 – Jan 2026

- Built backend services and API integrations using Flask for a WhatsApp automation platform used by 40+ clients.
- Revamped internal dashboard (using React, TypeScript, Tailwind), improving workflow efficiency by 30% through better UI/UX and state management.
- Integrated third-party AI services including ElevenLabs Voice APIs to enable real-time voice interactions.

Backend Developer Intern, CShare — Remote Feb 2025 – Jul 2025

- Developed REST APIs and data-intensive dashboards, automating the generation of over 50 weekly client reports.
- Built a real-time geo-tracking system using WebSockets and Redis, enabling sub-second location updates.
- Optimized PostgreSQL queries with indexing and schema optimization, improving query performance by 35%.

PROJECTS

SensAI : AI SaaS Platform | [Live](#) | [Demo](#) Oct 2025 – May 2026

- Engineered a full-stack AI SaaS platform using Next.js, PostgreSQL, and Gemini AI for resume generation, ATS optimization, and AI-powered mock interviews, reducing resume creation time by 50%, improving interview readiness.
- Developed scalable backend APIs and data models with Prisma and PostgreSQL, implementing caching strategies to improve response times for AI-powered resume analysis and generation workflows.
- Orchestrated cron-driven workflows using Inngest to aggregate, process, and visualize job-market insights, including salary trends and hiring patterns across 1,000+ roles.

Chess AI Engine | | Tech Stack: Python, PySide6, Stockfish, PyTest Oct 2025 – May 2026

- Developed a chess engine using Minimax and Alpha-Beta Pruning, reducing move evaluation time by 60% and enabling deeper game-tree exploration.
- Designed a heuristic board evaluation system and optimized move generation, delivering real-time AI gameplay with strategic position analysis and decision-making.

Trendora: An Online Clothing store | [Demo](#) July 2025 – Sept 2025

- Engineered a full-stack MERN e-commerce platform with JWT authentication, RBAC authorization, PayPal integration, secure checkout workflows, and a centralized admin dashboard.
- Designed RESTful APIs and MongoDB schemas for catalog, cart, inventory, user, and order management, enabling efficient transaction processing and administration.

EDUCATION

Krishna Institute of Engineering and Technology (AKTU) Ghaziabad, Uttar Pradesh

Bachelor of Technology in Electrical and Electronics (Minor in Computer Science)

2020 – 2024

- Relevant Coursework:** Data Structure & Algorithms, Object-oriented programming, Computer Networks

ACHIEVEMENTS

- Solved **800+ DSA problems** across [LeetCode](#), [GeeksForGeeks](#), and [CodeChef](#).
- Achieved **Global Rank 347** in **LeetCode Weekly Contest 261** out of 14,856 participants.
- Institute Finalist** in Hacktoberfest Hackathon 2023.
